PROFILE

AI Engineer candidate (GPA: 3.98/4.0) specializing in **LLMs, multimodal systems, and AI-driven automation**. Built production-style AI systems including **CV ranking engines, OCR pipelines, and AI assistants**. Strong in **Python, REST APIs, and end-to-end AI workflows** from data processing to deployment.

EDUCATION

Nile University, *BSc. in Artificial Intelligence* Expected 2027 | Al Sheikh Zayed, Egypt

- GPA: **3.98/4.0**
- **Honors Assembly Award** for Outstanding Academic Performance (2025)

King Faisal School, *International Baccalaureate Diploma* Graduated 2023 | Riyadh, Saudi Arabia

- Studies: Mathematics, Computer Science, Physics, Business
- Awarded **Prince Saud Al-Faisal Award for Scientific Success**.

PROFESSIONAL EXPERIENCE

National Training Academy (NTA), *AI Intern* 08/2025 – 09/2025 | Egypt

- Built an **AI-powered CV ranking system** using Llama 3.1 + LoRA for candidate-job matching
- Designed **LLM pipelines with structured outputs, scoring logic, and skill gap detection**
- Developed **multilingual processing pipelines** (language detection + translation)
- Engineered **OCR system (OpenCV + Tesseract)** for noisy document extraction
- Presented AI solutions and insights to senior stakeholders

Microsoft ASU, *Front-End Instructor* 11/2024 – 01/2026 | Egypt

- Delivered training in HTML, CSS, JavaScript to university students
- Designed projects emphasizing **clean architecture and usability**

Nile University, *Junior Teaching Assistant* 02/2025 – 06/2025 | Egypt

- Mentored 50+ students in **OOP, debugging, and memory management**
- Conducted code reviews and improved student code quality

PROJECTS

Multimodal Nutri-Score Classification, *UGRF 1st Place Winner*

- Built a **multimodal deep learning model** combining images, text, and tabular data
- Achieved **performance gains over unimodal baselines via fusion techniques**
- Won **1st place in Nile University UGRF Competition**

Arabic Aspect-Based Sentiment Analysis (ABSA), *DeepX 2026 AI Hackathon (3rd Place)*

- Architected an end-to-end NLP pipeline for morphologically rich, low-resource Arabic text during a 12 hour sprint.
- Handled aspect extraction and sentiment classification, securing a paid internship at **Vionex Digital Solutions**.

Career Guidance AI System (Flask + LLM APIs)

- Developed an **AI platform for career recommendations + CV evaluation**
- Integrated **Gemini API + structured reasoning pipelines**

- Built full system: authentication, AI workflows, dashboards

PDF CV Ranker (Llama 3.1 + LoRA), Internship Project

- Designed **NLP pipeline for CV-job matching with real-time scoring**
- Exposed via **Flask REST API with multilingual support**

Egyptian National ID OCR System, Internship Project

- Built **computer vision pipeline** for detection, correction, and text extraction
- Achieved high accuracy using preprocessing + OCR optimization

Other Projects:

- Mobile Service Usage Analysis (NetMob 2023, IEEE-style report), Restaurant Management System (Flask + SQL), Raspberry Pi Smart Home Automation, Interactive AI Storyteller

SKILLS

AI / LLMs — LLM APIs (OpenAI, Gemini), Prompt Engineering, Structured Outputs, Embeddings TensorFlow, PyTorch, Scikit-learn, OpenCV, Tesseract

Programming — Python, JavaScript, C++, C, Java, SQL

Web & APIs — Flask, REST APIs, JSON, HTML, CSS

Tools — Git, Docker, VS Code, AI coding assistants

Languages — English (Fluent), Arabic (Native)
